(2019-20)

Unit 2: Software Project Management Knowledge areas case study

Skill Development - ability leading to report writing and analysing project requirements necessary for a project manager.

- Assignment - (2019)

Date:

Name :- Megha Dnyanesheshwar Jadhav. 7/10  
Roll No :- 5811  
Subject :- Software Project Management.

1) Case Study - 1

Project title : Execution Information System

Project Manager Name : Scott Daniels.

Problems Several quality problems developed with the EIS after a few months of operations. The system started going down a couple of times a month, and the response was getting slower. How could a summary report show totals that were not consistent with a detailed report on the same information.

What went wrong?  
People were complaining that they could not get into the web based systems. users complained when they could not access information within a few seconds. several people kept forgetting how to log-in to the system, thus increasing the number of calls to the companies help desk.

What has to be done?  
According to the case study the first thing scott's team did was to research the
