

**Software Engineering**

<b>Semester – IV</b>	<b>Subject Code: BS41602</b>	<b>Lectures: 60</b>
----------------------	------------------------------	---------------------

**Objectives:**

The syllabus aims in equipping students,

- To learn basics of system analysis and design
- To learn various process models used in practice
- To learn principles of software testing
- To learn to build analysis model

**Unit 1: Introduction to system and software**

8

**1. System concepts**

- System definition
- Characteristics of a system : Organization, Subsystem, Interaction, Interdependence, Integration, Central objective, Standards, Black-box
- Elements of a system: Outputs, Inputs, Processor(s), Control, Feedback, Environment, Boundaries, Interface
- Types of systems : Physical and Abstract Systems, Open and Closed Systems, Computer-based Systems ( Management Information System and Decision Support System)

[Ref. book 1-Chaper 1]

[Ref. book 2-Chaper 1]

**2. Software and Software Engineering**

- The Nature of Software-defining software, software application domains, Legacy software
- Software Engineering: A Layered Technology
- The Software Process(Generic process framework , Umbrella activities)

[Ref. book 2-Chaper 1]

<p><b>Unit 2: SDLC and process model</b></p>	<p>22</p>
<p><b>3. System Development Life Cycle (SDLC)</b></p> <ul style="list-style-type: none"> <li>• Introduction</li> <li>• Activities of SDLC-             <ul style="list-style-type: none"> <li>➤ Preliminary Investigation -                 <ul style="list-style-type: none"> <li>➤ Requirements engineering tasks(Inception, Elicitation, Elaboration, Negotiation, Specification, Validation, Requirements Management)</li> <li>➤ Fact finding techniques(Interview, Questionnaire, Record Review, Observation)</li> </ul> </li> <li>➤ Determination of system requirements</li> <li>➤ Design of a system</li> <li>➤ Development of software</li> <li>➤ System testing (Unit Testing, Integration Testing, System Testing, Acceptance Testing)</li> <li>➤ System implementation and evaluation</li> <li>➤ System maintenance</li> </ul> </li> </ul> <p>[Ref. book 2-Chaper 1] [Ref. book 1-Chaper 7]</p> <p><b>4. Process Models</b></p> <ul style="list-style-type: none"> <li>• A Generic process model</li> <li>• Prescriptive process models             <ul style="list-style-type: none"> <li>➤ The Waterfall model</li> <li>➤ V-Shape model</li> </ul> </li> <li>• Incremental Process Models             <ul style="list-style-type: none"> <li>➤ The incremental model</li> <li>➤ The RAD model</li> </ul> </li> <li>• Evolutionary Process Models             <ul style="list-style-type: none"> <li>➤ Prototyping</li> <li>➤ Spiral Model</li> </ul> </li> <li>• Concurrent Models             <ul style="list-style-type: none"> <li>➤ The concurrent development model</li> </ul> </li> </ul> <p>[Ref. book 1-Chaper 2,3]</p>	

**5. An Agile View of Process**

- Introduction to agility, agile process
- Human factors
- Introduction to agile process models( Extreme programming, Adaptive software development, Dynamic system development method, Scrum, Crystal)

[Ref. book 1-Chaper 4]

**Unit 3: Structured analysis and software testing**

18

**6. Structured analysis development strategy**

- Structured analysis-definition, component, data flow analysis
- Features and tools of data flow analysis
  - Logical Data Flow Diagram ( Logical DFD )- notations, drawing a context diagram, exploding a context diagram into greater detail (1<sup>st</sup> level, 2nd Level DFD etc...)
  - Evaluating Data Flow Diagram for correctness
- A Data Dictionary-definition, importance, components
- Structure chart-definition, notation(Module, Condition, Jump, Loop, Data Flow, Control Flow)
- Case study

[Ref. book 2-Chaper 4]

**7. Software Testing**

- Introduction
- Quality assurance
- Walkthroughs and Inspections
- Types of testing( Functional testing, System testing, end-to- end testing, regression testing, Acceptance testing, Load testing, Stress testing, Performance testing, Usability testing, install/uninstall testing)
- Unit testing and debugging(Black box, White Box, Grey Box testing)
- System testing( Integration Testing and Acceptance Testing)
- Introduction to Software testing tool

[Ref. book 3-Chaper 8]

\*Contact hours – 12 hours
