### Internship Completion Letter

I write to certify that Ms Neeta Bishnoi took part in a research study to understand the demand-supply gap in the Logistics & Supply chain sector in Pune between 26th-30th Apr, 2020.

The study involved a triangulated approach. It involved the employer's perspective in terms of job roles, skills required and scope of growth while also trying to understand the capacity of the skilling organisations to train youth and aspirations/existing qualifications of youth to join the industry. She was involved in the research design, collection of primary and secondary data, data analysis and report making. The research will be a base for future action planning in the Global Opportunity Youth Network program, a collective action program led by Aspen Institute and hosted by Pune City Connect.

This letter is issued as a soft copy because of the pandemic related restrictions.

We wish her well for her future endeavours.

Sincerely,

**Mrinal Gharpure**

**Director**
