BUDGET AND EMERGENCY FUND

Creating a Budget

Step 1: Identify the client's financial goals and determine what is required to reach them.

Step 2: Estimate income from all sources.

Step 3: Estimate expenses. These should be divided between fixed and variable.

Step 4: Compare income and expenses to determine if expected expenses are equal to greater than or less than expected income.

Step 5: If expenses are too high, identify potential sources of additional income or places where expenses may be reduced.

Step 6: Present each category of income and expense as a percentage of the total. This will make year-to-year comparisons easier. It may also lead to more efficient use of resources.
