“Declutter and Donate” (Law Club Initiative) – 07th July 2019
Department of Accountancy in collaboration with SWaCH

In a world shrouded by consumerism “Reduce, Reuse and Recycle” may be incompatible. However these three ways are highly essential for eliminating waste and protecting the environment. This calls for not only imparting education and creating awareness on the effects of waste, but the most important aspect of cleaning it to use this waste and convert it to more useful products.

With this objective in mind the Law Club under Department of Accountancy collaborated with SWaCH in an initiative titled “Declutter and Donate”, on 7th July 2019 - a Mega collection drive in Trillium society, Magarpatta City, Hadapsar. Eleven girls of our College volunteered in this initiative by spreading awareness and helping in collecting and sorting out the pre-owned articles which were collected. Items such as clothes, footwear, toys, plastic bottles, old furniture, utensils, etc., were collected which will be further recycled and sold.

Community Asset Mapping

Number of participants: 02

In the 4th week at AASRA, the volunteers mostly played fun learning games like Mafia and zombie game with the children and worked on basic grammar and pronunciation. The volunteers attended the introductory session of Community Asset Mapping (CAM) which was guided by Tara. They learnt the fundamentals of CAM which included knowing major topics like why it is important to keep records of assets of a community as well as minor queries such as what are open ended questions and what role they play in CAM. To make sure volunteers understood the process Tara divided them in two teams and asked them to attempt an Asset Map each, later giving each map awards like maximum number of assets, best team work and most organized. This gave the volunteers a sense of achievement and motivated them to study Assets and bag more awards in the next session. It also gave them a better idea about what they'll be working towards in AASRA. The volunteers are looking forward to teaming up and helping the Community armed with the new skills they've learnt. Two volunteer Shreya Humnabadkar and Ayushree Nair went on to be involved with the CAM programme for the entire year.

Day 7 – 12/12/2019; Thursday

Our mornings in the camp started with prayer i.e. Sanctuary, followed by University Song, NSS Song, Pranayam and exercises.

All the NSS volunteers cleaned the premises of ZP Primary school toilet, premises of the Samaj Bhavan where we were staying, one big hall and two small rooms were also cleaned to be handed over to the Sarpanch. We very proudly handed over the rooms to them cleaner than what we had received them in.

Prize distribution of the Colouring Competition was done at the hands of the student volunteers. The volunteers bid a tearful farewell to all the villagers and came back to Pune with fond memories in their heart and learnings of simplicity, service and gratitude to remember forever.

COVID RESOURCES STUDENTS' ASSOCIATION (2020-21)

Covid Resources Students' Association is a initiative started by Taarini Das, Urvi Shetty and Karuna Das, our students who came together to help India heal via Social Media! They thought it was important for such a campaign to be carried out because it clearly was the need of the hour. They wanted people to spend time with their loved ones during these times rather than run around for resources.

CRSA India helps people by providing well researched and accurate verified information to fulfill their requirements. They have a team of enthusiastic volunteers from around the country (103) helping them to be more, learn more and help more. In the span of 3 weeks, they have been able to help around 2000 people around India and have decided to be there for people as long as they're needed to be.

They have a team for collection of well researched data and resources from different social media platforms, websites. One the resources have been sent on the group. CRSA India volunteer heads for every state make sure that most of the data is verified and updated on the spreadsheet that consists of all genuine and verified data made available for everyone in need.

The group has a Google meeting from 10AM to 10PM every day for the entire team whoever is free to join. On this call, the team helps in verification of all data. They personally call up all the resources on the spreadsheet every day to confirm availabilities.

The team gets a lot of requests through their personal social media handles and also their main Instagram page - @CRSAindia. The team try to help as many people as they can.

CRSA i.e. Covid Resource Student Association is an organization run by students to help people in dire need of Covid resources by providing verified and well researched data. During this time of uncertainty and noise, The Covid Resource Student Association was committed to being in the front-line to help provide resource. It was important to conduct such a campaign simply because it was the need of the hour. CRSA wanted to help people with verified information, so that instead of running around for resources, people could attend to the needs of their loved ones. It was also set up with the intention of boosting people' morals since the association couldn't be directly involved in supplying resources.

Urvi Shetty, a sociology student at St. Mira's College, Pune, launched Covid Resource Student Association (CRSA) in association with Taarini Das and Karuna Das. The project officially began on the 19th of April 2021. A group of 35 NSS volunteers from St Mira's College joined hands to work together with CRSA to do their bit in helping the country heal and get through these trying times. Together they were working on helping COVID patients and their families to get access to resources like medicines and injections keeping the government regulations in mind, real-time availability of ICU and oxygen beds, plasma donors, tiffin facilities, ambulance services to name a few. In this endeavour, the NSS volunteers group helped them in the data collection and verification of the data across the country. In a short span of forty five days, the volunteer team succeeded in helping over 2000 patients. The team helped patients not only from Pune but also from the cities like Agra, Bengaluru, Delhi, Mumbai, Jaipur, Jhansi and Dehradun etc. through various social media platforms. The messages that the volunteers received from people thanking them for leads, resources or even some moral support, is what kept them encouraged and motivated to keep helping people every day.
