Green Club
Solid Waste Management-Clean City Initiative

On 21st July 2022, the Green Club of St. Mira's College for Girls organized a session titled, "Solid Waste Management". The session was a joint initiative by Green Club and Janwani (a public charitable trust formed by Maratha Chamber of Commerce, Industries and Agriculture, Pune) and Adar Poonawalla Clean City Initiative. 124 students of Second Year across different streams attended the program with Green Club faculties.

Mr. Shaikh Faiz Ahmed (Janwani and Adar Poonawalla Clean City Initiative) spoke about causes of piling up of solid wastes and the ways to alleviate it. The speaker introduced the audience to the rationale of APCCI. According to APCCI the waste and garbage not only is damaging our health and environment but it is an embarrassment to foreigners and visitors who visit India. Today it has over 200 trucks/ machines and over 400 employees for managing this activity covering more than 600 kms of roads in Pune.

The clean city initiative addresses this issue by deploying state of the art machines. Equipment deployed include, Glutton Vacuum Litter Picker, Trilo Vacuum Truck, Truck Mounted Road Sweepers, which uses the best technology to pick up and clear the waste from the streets. Vehicle mounted pothole filling machine to fill potholes in the shortest possible time. The speaker discussed the way all individuals can work towards cutting down waste creation and adopt recycling.

Mr. Ahmed along with his team on behalf of APCCI appealed to the staff and faculties to contribute by participating in the various initiatives of the organisation. The session was very well received by the students. They promised to actively work towards environment sustainability.

Green Club - Awareness drive on 'Zero Garbage Model' for Pune City (2021-22)
Wednesday, 20th July, 2022
12.00pm to 13.00pm

The Green Club of St. Mira's College for Girls, Pune organized an awareness drive in collaboration with Janwani (a public charitable trust formed by Maratha Chamber of Commerce, Industries and Agriculture, Pune) and Adar Poonawalla Clean City Initiatives on 'Zero Garbage Model;' for Pune City on 20th July 2022, which took place at Room No. 301 at 12 pm.

The lecture was conducted by Mr. Shaikh Faiz Ahmed (Speaker on behalf of Janwani and Adar Poonawalla Clean City Initiative) gave the details of their different initiatives towards the implementation of the project that aims to change the view of waste as garbage to waste as a renewable, potentially valuable resource. 113 students of Third Year attended the program with Green Club faculties.

The session was very interactive as students also suggested some measures for clean-up drives, waste segregation and 3 Rs i.e. reduce-reuse-recycle. Some of the major points covered in the drive was: My APCC (app that allows the citizens of Pune to garbage location and accordingly leads to action of garbage picking); Swatch system of waste segregation; Rwanda's National Cleanup Day to eliminates Trash (landlocked country in the Great Rift Valley of Central Africa); Different uses of waste (eg. Bioethonal, Bio CNG), etc.

The session was conducted by Asst. Prof. Deepanjali Mazumder. The intent of this awareness drive was to educate and inculcate the importance of waste management in students, which would make them responsible citizen and increased contribution towards environment conservation.

1. Rainwater Harvesting

Rainwater harvesting provides an independent and supplementary water source, to ease water stress. An EN2000 RWH rooftop filter model, covering a 1500 sq.ft. parking shade), has been installed. Particulate and suspended matter removal occurs due to fitting of self-cleaning, non-clogging SS304 rooftop filters (food grade material) to the down-take pipes. The model operates on centrifugation and cohesive force; uses 'zero' energy, existing borewell and recharge pit for water table recharge.

St Mira's College: Annual Average Rainwater Harvested

Year	Average Rainfall in Pune (mm)	Amount of water harvested (litres)
2017-2018	1,091.0	1,52,036.300
2018-2019	941.1	1,31,133.055
2019-2020	1,004.6	1,39,912.400
2020-2021	772.0	1,07,582.060
2021-2022	722	1,00,614.021

Rainwater harvested = Average rainfall in Pune (mm) x Roof surface area (m²)

2. Construction of tanks and bunds

Construction of tanks – The college ensure sufficient supply of water through tanks installed at different places. There are ten numbers of overhead tanks- 6 tanks at 3rd floor terrace, 3 tanks on canteen terrace, 1 big cement tank on library terrace. There is one underground water tank of 75000 litres of capacity.

3. Maintenance of water bodies and distribution system in the campus

The ground water is pumped into storage tanks located at different places in the campus. There are four numbers of overhead storage tanks. The water is distributed through well laid pipe network. Drinking water is supplied through a separate set of distribution pipes and water for all other purpose is supplied through another set of distribution pipes.

Entire distribution system is well supervised by INFRASTRUCTURE committee to ensure that there are no leakages and wastages of precious water through joints, valves etc. Waste usage of water is reduced using low pressure flushes. All the stakeholders of the college are well educated to use water economically and efficiently.
