7.1.4 Water conservation facilities available in the Institution:

- | | |
|--|-------------------------------------|
| 1. Rain water harvesting | <input checked="" type="checkbox"/> |
| 2. Construction of tanks and bunds | <input checked="" type="checkbox"/> |
| 3. Maintenance of water bodies and distribution system in the campus | <input checked="" type="checkbox"/> |

Options:

B. Any 3 of the above

Principal Incharge
St. Mira's College for Girls, Pune.

St. Mira's College for Girls, Pune
Autonomous (Affiliated to Savitribai Phule Pune University)

1. Rainwater Harvesting

Rainwater harvesting provides an independent and supplementary water source, to ease water stress. An EN2000 RWH rooftop filter model, covering a 1500 sq.ft. parking shade), has been installed. Particulate and suspended matter removal occurs due to fitting of self-cleaning, non-clogging SS304 rooftop filters (food grade material) to the down-take pipes. The model operates on centrifugation and cohesive force; uses 'zero' energy, existing borewell and recharge pit for water table recharge.

St Mira's College: Annual Average Rainwater Harvested

Year	Average Rainfall in Pune (mm)	Amount of water harvested (litres)
2017-2018	1,091.0	1,52,036.300
2018-2019	941.1	1,31,133.055
2019-2020	1,004.6	1,39,912.400
2020-2021	772.0	1,07,582.060
2021-2022	722	1,00,614.021

Rainwater harvested = Average rainfall in Pune (mm) x Roof surface area (m²)

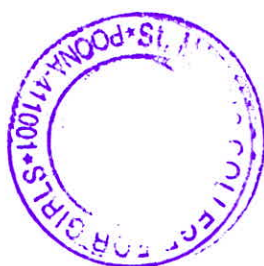

2. Construction of tanks and bunds

Construction of tanks – The college ensure sufficient supply of water through tanks installed at different places. There are ten numbers of overhead tanks- 6 tanks at 3rd floor terrace, 3 tanks on canteen terrace, 1 big cement tank on library terrace. There is one underground water tank of 75000 litres of capacity.

3. Maintenance of water bodies and distribution system in the campus

The ground water is pumped into storage tanks located at different places in the campus. There are four numbers of overhead storage tanks. The water is distributed through well laid pipe network. Drinking water is supplied through a separate set of distribution pipes and water for all other purpose is supplied through another set of distribution pipes.

Entire distribution system is well supervised by INFRASTRUCTURE committee to ensure that there are no leakages and wastages of precious water through joints, valves etc. Waste usage of water is reduced using low pressure flushes. All the stakeholders of the college are well educated to use water economically and efficiently.
